DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feeder portion of the diaphragm for inserting a connecting cable to connect with the voice coil must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Walsh (U.S. patent 3,424,873).

Regarding claims 1 and 8, Walsh teaches a metal diaphragm body (1), and a paper auxiliary diaphragm (32) that is integrally bonded to a part of the diaphragm body (see col. 14, line 75 through col. 15, lines 1-2, and figure 8).

Regarding claim 2, Walsh shows the auxiliary diaphragm (32) that is formed to cover only the center portion of the diaphragm body (figure 8).

Allowable Subject Matter

4. Claims 3-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Barton (U.S. patent 1,713,210) teaches a loudspeaker that comprises a paper cone diaphragm (4) and a metal spider (26).

Tamura (U.S. patent) teaches an aluminum subcone (4) in a loudspeaker that is fixed to the front of the paper cone (3).
